About Us

Whitley Manufacturing has constructed prefab & modular buildings since 1946, serving a nationwide + international clientele from three factory locations.

Our modular construction system delivers custom, high-quality buildings with four major advantages versus conventional construction:

Speed, Safety, Savings, Sustainability.

A Customized Modular Workforce Solution in Three Simple Steps.

1

ASSESS YOUR NEEDS.

Assess your needs at the work site. This includes: the number of employees to be housed, restroom + shower facilities, dining + food preparation, recreation, and support facilities.

2

REVIEW SOLUTION PACKAGE.

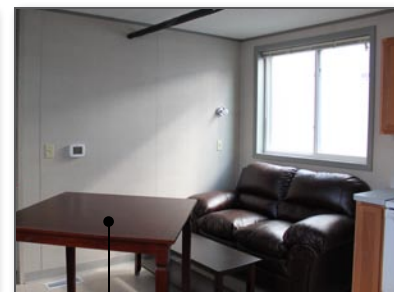

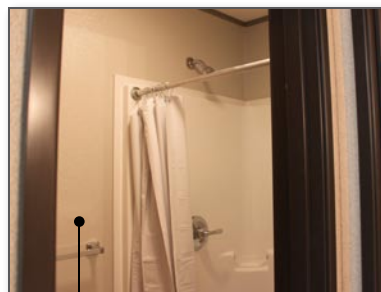

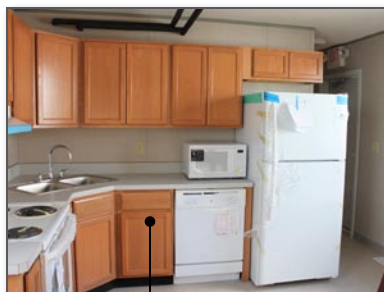

We will recommend a package of prefab buildings to meet your needs. Types include: sleeper units, offices, shower / locker / restroom, clearspan space, and support facilities.

3

GET TO WORK.

Our modular buildings are constructed on an accelerated timeline and will be installed at the site by one of our experienced distributors. Our Workforce Solutions are relocatable.

Furnished Modular Sleeper Unit Interior Photos.

Site-Specific Workforce Solutions.

All Your Worksite Facility Needs From a Single Source. Use Any Combination of Prefabricated Component Types Below to Meet Your Site-Specific Needs.

Modular Buildings.

Relocatable or Permanent Commercial Modular Buildings. Can be customized to suit your needs at each worksite.

Modular Buildings are constructed off-site using the latest in construction technology in an enclosed production facility. Rigorous QA / QC programs insure a high-quality and durable commercial facility. Customization of plans and specifications are available. Our modular workforce buildings are relocatable, giving you the flexibility to adapt to changing situations in real-time.

Available for all US sites.
CSA-Compliant.

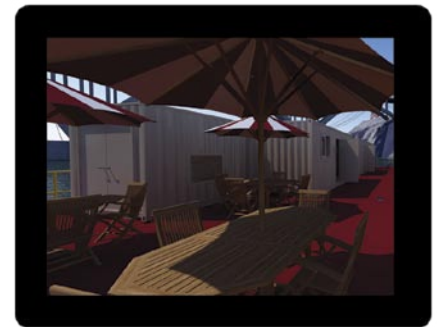

Containerized.

Facilities comprised of modified ISO shipping containers. Can be transported intermodally and exported overseas.

ISO Shipping Containers are durably constructed of steel, are designed to be stackable, can be intermodally transported, and are readily available in the U.S. The standardization of ISO containers allows for synergy during installation and transportation. Containers are modified and outfitted per your specifications, delivering durable and economical space.

Habitable Structures.
Restrooms.
Equipment Shelters.

Clearspan Space.

Our High-Ceiling Clearspan system is a relocatable, prefabricated component delivering ceiling heights up to 20'.

Available exclusively from Whitley Manufacturing. Our High-Ceiling Clearspan system is a proprietary prefab component used to construct open clearspan facilities with ceiling heights up to 20'. Roof components ship to the site laying flat, then 'un-fold' and are fastened in place on a site-poured slab. Relocatable and packaged with panelized walls to complete the building exterior.

Storage / Warehouse.
Cafeteria / Recreation.
Equip. / Vehicle Storage.

Support Facilities.

Commercial Kitchen, Telecommunications, Equipment Shelters, Blast-Resistant Buildings.

Modular support facilities can complete and complement your worksite facilities. We provide a range of options including commercial kitchen units, waste storage / water supply tanks & enclosures, equipment shelters, blastproof buildings, and a variety of communications and data buildings. These facilities can support either conventional or modular buildings.

Commercial Kitchen.
Pumphouses.
Blast-Resistant.
Steel Enclosures.
