EQUIPMENT INSTALLED & TESTED

ABOUT WHITLEY SHELTERS

Whitley Manufacturing custom designs and builds modular enclosures to meet your specifications for a variety of applications. Our manufacturing environment limits risk, shortens the project schedule and improves quality when compared to traditional field constructed systems. For ease of equipment installation, the enclosure can be shipped in two sections: the base frame and the lid module (walls and ceiling). Once all the equipment is installed and secured to the base, the lid section is lowered by crane and fastened to the frame to complete the building.

Constructed from high strength materials such as heavy gauge steel and concrete floors, the structure will protect expensive equipment from weather, theft and vandalism and other disasters. In turn, the noncombustible materials protect nearby buildings and property in the event of a fire.

Markets Served Include:

- Communications
- Cable Landing Stations
- Education
- Government
- Health Care
- Industrial
- IT - Data Centers
- Battery Storage

Our four facilities build custom modular buildings for a national clientele. Consistent labor rates & volume purchasing give us the ability to offer exceptional buildings that are also an exceptional value. Plus our construction system reduces time lines & overruns.

South Whitley, IN p. 260-723-5131 | f. 260-723-6949

Rochester, IN p. 574-223-4934 | f. 574-223-8779

Marysville, WA p. 360-653-5790 | f. 360-659-7735

MECHANICAL ENCLOSURES

Providing
Modular Solutions

ENCLOSURES

1 We will fabricate and ship you the base frame.

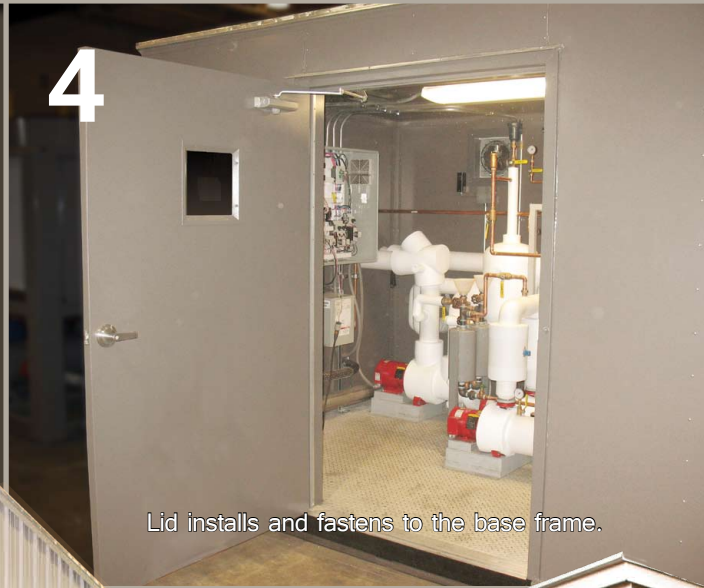

3 We will fabricate and ship the Lid.

You install your equipment on the base frame.

4 Lid installs and fastens to the base frame.

Applications

- HVAC
- Telecommunications Equipment
- IT/Network Equipment
- Data Centers
- Processing Equipment
- Pumping Systems
- Boilers
- Chillers
- Generators
- Water/Sewage
- Battery Storage
- Cable Landing Station

Unique Benefits

- Drop over enclosure for easy installation and future maintenance
- Engineered & fabricated specifically for your equipment
- Heavy gauge steel framed walls
- Oversized doors for easy install/removal
- Commercial steel ext. cladding
- EPDM rubber membrane roof
- Commercial steel door
- EMT wiring
- Controlled costs
- Relocatable

Complete equipment & shelter ready to serve your customer.
